PROFILE

Frontend-focused Software Engineer with 2+ years building scalable, user-centric React.js applications for a global advertising platform. Skilled in TypeScript, Redux Toolkit, Zustand, and MUI, with a strong DSA foundation and hands-on experience using AI-assisted workflows (Claude Code) to accelerate delivery.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Java (Core)

Frontend: React.js, React 19, Redux, Redux Toolkit, Zustand, MUI (Material UI v7), Chakra UI, Bootstrap, Formik, Yup, TanStack Query (React Query), Responsive & Accessible UI Design

Backend & APIs: Node.js, Express.js, RESTful API Design & Integration, MongoDB

Tools: Git, GitHub, Bitbucket, Jira, Postman

Practices: Data Structures & Algorithms (DSA), Agile/Scrum, Code Review, Cross-Functional & Remote Collaboration, AI-Assisted Development (Claude Code), Prompt Engineering

EXPERIENCE

Software Engineer — Knorex India Pvt. Ltd.

Mar 2024 – Present

XPO (Advertising Platform) & XMC / Admin Panel

Pune, India

- Developed and optimized key frontend modules in React.js and Redux for a large-scale advertising platform serving global clients.
- Built reusable, accessible UI components with MUI, improving development velocity and application performance under tight deadlines.
- Engineered end-to-end entity-management workflows (create, edit, deactivate) using React 19, Formik, and Yup for robust form validation.
- Integrated RESTful APIs and third-party ad platforms (Google, TikTok, LinkedIn, Meta) to enable real-time data handling and Business Manager authentication flows.
- Diagnosed and resolved complex state-management issues in Zustand stores, including race conditions and infinite API-call loops, improving stability and performance.
- Built dynamic theme-customization features enabling white-label UI theming across the admin panel.
- Adopted AI-assisted development workflows using Claude Code — built custom agents and internal documentation to speed up feature delivery and bug fixes.

PROJECTS

Ebay – Ebuzz | Online Marketplace Platform

- Built an online marketplace platform enabling individuals and businesses to buy and sell goods and services using React.js.
- Implemented Sign-in/Sign-up and Authentication flows for secure user access.
- Developed the Shopping Page, Cart Page, and Payment Page, focusing on responsive UI and smooth user experience.

EDUCATION

Masai School, Bengaluru

06/2022 – 04/2023

Full-Stack Web Development (Full Time)

Kalinga University, Naya Raipur

08/2019 – 04/2022

Bachelor of Computer Applications
